

Port Tire Users.

It's Time For You To Accept The ContiChallenge.

At Continental, we are so confident you will realize the lowest-cost-per-hour by using our port tires

- Port OTR (radial & cross-ply)
- Industrial Pneumatic (radial & cross-ply)
- Port solid (Super Elastic and Press on bands)

... that we challenge you to prove otherwise. Just try any axle sets of Continental port tires on one of your ECH, Reachstacker, AGV, Straddle Carrier, Terminal Tractor/Trailer and at the same time install another tire brand on a comparable equipment*. If our tires do not yield you the lowest cost per hour compared to the other brand, we will credit you the DIFFERENCE toward your next set of Continental tires!*

Most manufacturers are not offering this type of challenge to compare brands. We can, because Continental port tires are designed to make the difference when it comes to total cost of ownership.
